Abstract (en)
An ECG lead system (100) for use with a plurality of unique diverse ECG floor monitors (10) for when a patient is substantially immobile and/or a plurality of unique diverse ECG telemetry monitors, is provided. The ECG lead system includes a plurality of unique adapters (200 x ,500), wherein each adapter includes an input receptacle configured for selective electrical connection with a device connector (310) of an ECG lead set assembly (300); and at least one unique monitor plug electrically connected to the input receptacle. Each monitor plug is configured to selectively electrically connect to a corresponding receptacle of a respective unique diverse ECG floor monitor (10) or unique diverse ECG telemetry monitor (20). The ECG lead system (100) may also comprise an ECG lead extension assembly (400).
